IQV20™ CORDLESS HEAT GUN

H3111

Meet the IQV20™ Cordless Heat Gun

Performance

With temperatures up to 1022°F and fan speeds up to 10CFM, the H3111 provides fast heat-up times that professionals need to get jobs done faster.

Control

Dual fan speeds and adjustable temperature controls on an LCD display allows the user to better control the work piece temperature. From protecting delicate materials from excessive heating or blasting stuck on adhesives with maximum heat, the H3111 can be custom tuned to best fit your application.

Versatility

Twisting the nozzle ejector provides quick changes between attachments without handling hot parts. Each H3111 includes a flat, round, and a reflector nozzle attachment to direct heat where you need it most.

Meet the HOTTEST Tool on the Market.

When you need heat in a hurry, the Ingersoll Rand® IQV20™ Cordless Heat Gun delivers – reaching operational temperatures up to 20% faster than the leading cordless competitors. Quickly customize to your application requirements with two airflow speeds up to 10 cfm and variable heat control settings up to 1022°F. The H3111 also features a lightweight build for comfortable all-day use and a dual speed slide switch for continuous, hands-free operation. Change attachments easily without handling hot parts with the twist nozzle ejector. Compatible with all Ingersoll Rand IQV20™ batteries, this tool enables portable productivity in a package that really brings the heat.

Programmable temperature display

Twist nozzle ejector for safe removal of hot nozzle attachments

Hanging hook keeps the tool within arm's reach

Slide switch for hands-free operation

Two Speed Selector:
Low: 7 cfm
High: 10 cfm

Ergonomic, over-molded handle for comfortable all day use

LED light for improved visibility on work piece

Tool rest keeps nozzle vertical when using hands-free

Compatible with All Ingersoll Rand® IQV20™ Batteries

Three nozzle attachments: flat, round, and reflector
